Open positions – European Youth Energy Network

Partnership & Funding Team (4-6h/week)

Energy Transition Careers Compass – #ETCC2024

Are you a driven student or young professional passionate about bridging the energy transition skills gap? Do you want to contribute your skills and curiosity to making the green energy market clear as daylight? Then the *Energy Transition Careers Compass* is the right place for you to thrive.

The Energy Transition Careers Compass was established in 2023 with a bold mission: to **map job roles and skills across the energy transition** job ecosystem and integrate this input into a **digital tool** which is accessible, comprehensive and inclusive. To achieve that, we've spread a questionnaire publicly to understand the current landscape in a comprehensive way — spanning from research and development to installation, operation and maintenance, policy and beyond. Our goal? To **showcase paths** beyond those traditionally associated with the energy transition and **empower professionals** of any age, especially **youth**, to embrace them.

The currently developed online tool was **launched in COP28** and presented at the Student Energy Summit and 5 official COP28 side events. What lies ahead? **Expansion, optimisation and innovation.** We're forming the 2024 team to keep up the good work and we need YOU! **Join us** as we continue to grow our data, enhance the already acquired information, and present our work on the global stage in international meetings and conferences.

European Youth Energy Network (EYEN)
80 Boulevard Auguste Reyers
